The meaningful pause. The energy it gives. The bright little lift. Coca-Cola with its never too sweet taste, refreshes best. Helps people meet the stress of the busy hours.

things go better with Coke

"COCA-COLA" AND "COKE" ARE REGISTERED TRADE MARKS WHICH IDENTIFY ONLY THE PRODUCT OF THE COCA-COLA COMPANY.

THIS IS NEWS . . . BUT NOT REALLY

An increase of over $4,000,000 in our dividend scale for 1965 . . . an increased interest rate on funds left with the company . . . extended benefits and privileges to existing policyholders . . . an exciting new policy . . .

These specifics are news, and fine news for our present and prospective policyholders alike.

Yet this sort of announcement is old hat. New England Life has raised its dividend scale, wholly or partially, in 10 of the past 12 years. Interest rate increases have long kept pace with the nation's economic health and the making retroactive of new benefits and privileges is a habit as old as the oldest mutual life insurance company in America—New England Life.

Committees and Organizations

Schedule of Committee and Commission Appointments, 1965-66

NOTE: The Committees listed herein have been authorized by President George W. Paschal, Jr., M.D., and/or are required under the Constitution and By-Laws.

Particular note should be taken of the authorization of the House of Delegates of a Commission form of organizational activity and that all Committees, excepting Committee on Nomination, Committee on Negotiation, and Committee on Grievances, are segregated under the respective Commission in which the function of the committee logically rests. This will tend to eliminate overlapping and duplication in activity programs and result in coordination of the work of the Society in a manner to lessen the work of the delegates in the Annual Meeting of the House of Delegates.

(The President, Secretary and Executive Director of the Society are ex-officio members of all Committees and, along with the Commission Chairman, should receive notice of meetings, agenda and minutes of committee meetings during the activity year.)

COUNCILORS DISTRICTS

Constitution and By-Laws of the Medical Society of the State of North Carolina

TEEN-AGE NUTRITION

When "child" must feed child...

A mother-to-be who is still in her teens must nourish two developing children: herself and her child! If her diet habits remain typically "teen" she will be ill equipped to meet the combined nutritional demands of pregnancy and adolescence.

Approximately 25% of American women bearing a first child are less than 20 years old. In 1960, teen-age girls gave birth to 593,746 children in the United States.

Many surveys indicate that teen-age girls are the most poorly nourished group in American society. Those who start their families in the early and mid-teens are most apt to be ill equipped to meet the combined nutritional burdens of pregnancy, lactation and adolescence.

Effective nutritional protection against pregnancy wastage, infant mortality and pre- and postnatal depletion in teen-age mothers should begin before conception and should continue throughout the child-bearing period. During pregnancy fetal demands are preferential and progressive. Essential nutrients not supplied by the diet or body stores are drained from maternal tissues to the detriment of the mother.

Lactation greatly increases maternal requirements for calories, proteins, minerals, and vitamins. The lactating mother supplies a 4-week old infant with an estimated 6.2 gm. protein, 42 gm. lactose, 182 mg. calcium, 0.6 mg. iron, and 20-30 mg. ascorbic acid daily.

A well-balanced varied diet adjusted in quantity to satisfy simultaneously the needs of pregnancy and adolescence offers the best nutritional assurance for a healthy teen-age mother and child. Basic to this diet is a milk quota of at least 1 quart a day during pregnancy and 1½ quarts a day during lactation—or their equivalent in other dairy products.

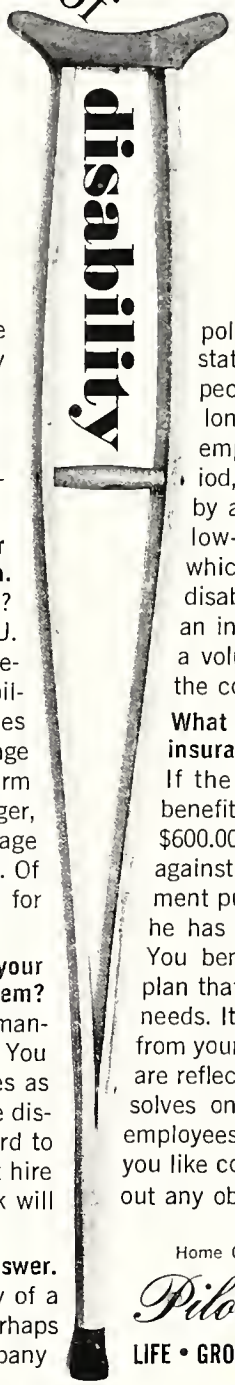
the importance of income continuation insurance in time of disability



Problem: How long will you continue the salary of an employee who is temporarily or permanently disabled? Three months? One year? Two years? For life? If you have never faced this problem you are indeed fortunate, because most businesses will many times over.

Incidence of disability many times greater than death.

What are the chances of being disabled? From a recent study reported in the C.L.U. Journal, the following startling facts are revealed. At age 30, the chances of a disability lasting 3 months or longer are 2.7 times greater than death. Of 1,000 people now age 35, approximately 330 will suffer a long-term disability, defined as three months or longer, before age 65. One out of three! The average length of disability will be over five years. Of this group nearly 30% will be disabled for life. Three out of ten!

Why does the employee problem become your problem?

Employees and the community look to management for help when adversity strikes. You recognize a moral obligation to employees as well as stockholders. You want to help the disabled man and his family. You can't afford to continue his salary indefinitely. You must hire someone to replace this man so the work will be done. What do you do?

Here is the logical and economical answer. You agree to pay all or part of the salary of a disabled employee for a stated period, perhaps three months. This could become company policy which, once set, serves as a definite statement of what your employees can expect from your company in the event of a long-term disability. Then, you help your employees help themselves after that period, at no cost to you. This is accomplished by allowing Pilot to offer your employees a low-cost group family security program, which guarantees a continuing income to the disabled employees, perhaps even providing an income for life. Your employees enroll on a voluntary basis at substantial savings over the cost of individual plans.

What are the benefits of disability income insurance?

If the employee pays the premium, all the benefits are tax-free and he can receive up to $600.00 per month. The employee is protected against loss of savings, life insurance, installment purchases and other obligations for which he has contracted monthly payments to meet. You benefit from an efficient, easily managed plan that fully meets employee disability income needs. It removes a potential double cost hazard from your business. Improved morale and attitude are reflected in improved efficiency. This program solves one of the most pressing needs of both employees and employers. Wouldn't you like complete information, without any obligation? **Write us today.**

ULTRASOUND THERAPY

Continuous or Pulsed witt the Burdick UT-400

The Burdick UT-400 produces a combination of thermal, mechanical, and chemical effects in tissue not possible with any other modality. Where both heating and mechanical effects are desired, the UT-400 provides *continuous* ultrasound energy. Where a greater proportion of mechanical effect to thermal is indicated the UT-400 unit provides *pulsed* energy. Effective dosage is well below the pain threshold—any sensation of pain serves as a warning of overdosage before tissue damage can occur. The UT-400 is especially recommended for treating acute or chronic conditions of osteoarthritis, capsulitis, myositis, bursitis, fibrositis, and periarthritis. Your practice requires this modern, effective therapeutic device.

Why do more North Carolina Doctors insure with The St. Paul?

Probably because our Professional Liability coverage is so thorough.

Really broad coverage. Fewer exclusions, so interpretations are no problem. The price is likely to be nice, too.

To get the folder that tells all about it concisely, write.

The St. Paul is the approved carrier for the State Medical Association here... and in more states than any other single insurance company. It must be something we offer!

Want to see just 1 insurance man and still be fully insured? Use our St. Paul Multicover Plan. Same agent as for Liability. He's in the Yellow Pages.

WHAT A DIFFERENCE A DAY MAKES . . .

One day is not much in the way of time, but one day added to another mounts up to a lot of time. The problem of "overstay" in hospitals is costly. Not only does it push up the price of Blue Cross for everyone, but it also makes hospital beds more difficult to get when you have seriously ill patients who need them.

Physicians help in holding down hospital costs by . . .

- discouraging too early admissions
- planning for operating room availability
- keeping a wary eye on overstay

Your cooperation is appreciated.

haven't smoked in a year?

you're entitled to lower rates on new life insurance

If you haven't had a cigarette in at least a year, it'll cost you less to buy new life insurance from us. We think people who don't smoke cigarettes (pipes and cigars are OK) are better risks, so we give them better rates. (State Mutual is the first major life insurance company to do this.) For all the details, call us or send us this coupon.
